

ELIMINATOR & CROW MAGNUM

.20 cal 26ft/lbs - .22 cal 28ft/lbs - .25 cal 30ft/lbs

No maintenance is required
Patented Gas Ram H.E. System
Power is unchanging for thousands of rounds

One of the worlds most powerful break action air rifles

Power is unchanging for thousands of rounds. No maintenance is required and totally reliable. In fact in many situations this rifle will rival the job that a rim fire rifle can do without the problem of over shooting. This makes for an easier time when applying for a Fire Arms Certificate on a smaller piece of land. When using the pellets recommended by Theoben the accuracy achieved by well known target shooter and writer, Terry Doe was outstanding, even at 50 yards. However, care must be taken on selecting pellet types because many just won't stand the pace.

The power has been achieved by the combination of producing the rifle with a long stroke piston and specially developed piston recoil damper valve and the well tried Theoben H.E. gas spring system.

The Evolution Trigger mechanism is based around a falling block system. It is a fully 2 stage unit with adjustment for second stage weight and travel. The .22 calibre is fitted with an Anschütz barrel, the .20 and .25 calibres are fitted with selected Walther barrels, both types are high quality and they are choked so accuracy is guaranteed. The stock is made from African Hardwood called Hyedua (*shed-u-er*), extremely pleasing to the eye and completely stable in use.

The Eliminator & Crow Magnum rifles can be fitted with either the Evolution or Vortex silencers or for countries with laws prohibiting the use of sound moderators Theoben can fit a Barrel Weight.

Forget your greasy old coil spring rifles - Go with modern technology

Calibre	.25	.22	.20
Pellet Type	H & N Trophy	Air Arms Field	Crosman Premier H & N Barracuda
Weight	20.0 grns	16.4 grns	14.3 grns

Energy	30 ft/lbs	27.5 ft/lbs	24.6 ft/lbs
Velocity at 50 yards	610 fps	750 fps	840 fps
Energy at 50 yards	16.5 ft/lbs	20 ft/lbs	22.4 ft/lbs
Velocity at 100 yards	420 fps	600 fps	650 fps
Energy at 100 yards	7.8 ft/lbs	12 ft/lbs	13.4 ft/lbs

Specifications

- ⊕ Break Barrel
- ⊕ FAC or Export only
- ⊕ H.E. Gas Ram System
- ⊕ Low Maintenance
- ⊕ No Recharging required
- ⊕ .22 Anschütz Barrels
- ⊕ .20 & .25 Walther Barrels
- ⊕ .177 Special Order
- ⊕ Dampa Mounts fitted
- ⊕ Weight : 4.1kg (8.9lbs) (unscoped)
- ⊕ Length : 114 cm (45") (Barrel Weight)
- ⊕ Length : 122 cm (48") (Evo. Silencer)
- ⊕ 2 stage trigger - 680g (1½ lbs) pull
- ⊕ Automatic Safety Catch
- ⊕ Hyedua Stock
- ⊕ Right Handed (Eliminator Stock)
or
- ⊕ Ambidextrous (Crow Magnum Stock)

Note : The Pellets tested here are the most accurate in each calibre, other pellets **will** exceed 30 ft/lbs easily but **will not** group as accurately. If these pellets as tested are used, best results will be achieved overall.

Optional Extras; Sling, Swivels, Gun Bag, 30mm Scope Mounts, Chronograph, Scope, Pellets. Also see accessories pages.
