## **Manufacturing unique products since 1987**

### **Safe Range EMF - Electromagnetic Field Meter**

#### **Protect your family from harmful EMFs!**

Measure the EMF (Electromagnetic Field) strength of every electrical device in your home, workplace or school; outdoor power lines, underground lines and even when you travel and shop for appliances. Health concerns about the negative effects of ELECTRO MAGNETIC FIELDS (EMF) from appliances, power lines, and home wiring have caused the U.S. Government to issue a warning to use "Prudent Avoidance" to help reduce your exposure to this risk.

Since EMFs are everywhere it may be impossible to totally avoid them. The Safe Range K-II EMF Meter can help you measure these potentially harmful fields and determine the safe range to help reduce exposure. It also helps you determine which appliances produce high level emissions.

#### FEATURES INCLUDE

- Easy to read LED Display
- 50 & 60 Hz operation
- Five level milliGauss ranges
- For indoor and outdoor use
- Durable plastic case
- Operates for months on a single 9V battery
- Detects the ELF range (50 to 1,000Hz) & VLF range (1,000 to 20,000Hz)
